

Orthotic and Prosthetic Technician##++

Associate in Applied Science

Minimum of 65 Credits

Students pursuing this associate degree complete general education courses at Oklahoma City Community College. All major and support courses are completed at Francis Tuttle Technology Center as part of the cooperative alliance.

Orthotic and prosthetic technicians manufacture appropriate devices according to the specific needs of patients with limb loss, fracture, and other orthopedic injuries and diseases. Providing orthotic and prosthetic care involves the application of clinical and technical processes to meet patient goals of function and mobility. This program provides students with a comprehensive education in both disciplines of orthotics (designing, fitting and manufacturing of orthopedic braces) and prosthetics (designing, fitting and manufacturing of artificial limbs). The application process for the program must be completed at Francis Tuttle Technology Center**. The program is accredited by the Council on Accreditation of Allied Health Programs (CAAHEP) and the National Commission of Orthotics and Prosthetics Education (NCOPE). Accreditation will give graduates eligibility to take the national registry examinations for technicians by the American Board for Certification.
