A premier, full-service, municipal engineering firm is actively seeking internships and full-time positions for Project Managers as well as Engineering Technicians. Myers Engineering, Consulting Engineers, Inc. provides service for municipalities, rural water districts, and other governmental entities throughout the state of Oklahoma.

**Project Manager:**

Project Managers would handle day-to-day management of projects in construction to include the progress of the project, budget tracking and pay requests, contractor relations and guidance, and assistance to the engineer in project decisions.

**Engineer Technician:**

Engineer Technicians would take direction from the engineers and help in design and coordination of the project development.

**Qualifications:**

Applicants must hold or are working toward a BS degree in Civil Engineering and/or holding or working toward an AAS degree in Pre-Engineering. Construction, engineering, and survey experience is a plus.
