

Fall 2019 Moodle Improvements

Course Load Times

Courses now only load content from the topic currently being viewed. This greatly reduces course load times for most courses.

HTML Editor in PLD

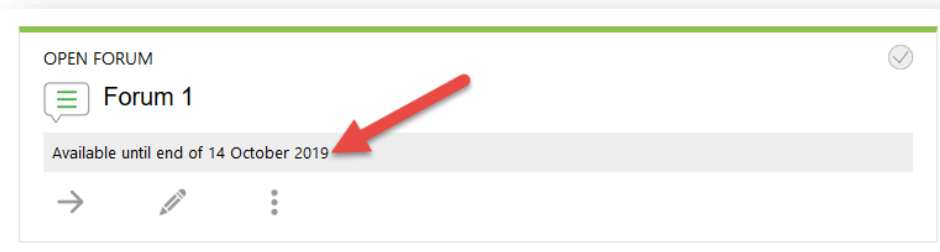

An HTML Editor has been added to the Body field when creating an Email rule in the Personalized Learning Designer. This allows instructors to format text and add images and links in emails sent from the PLD.

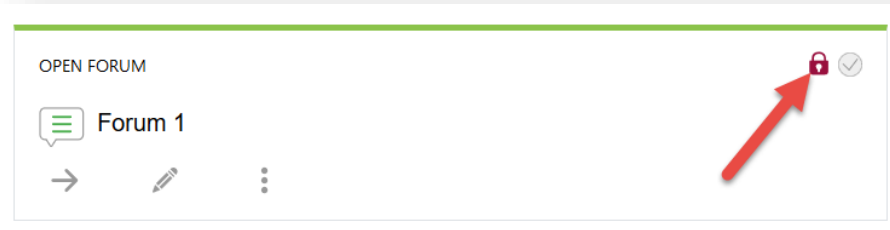

Restrict Access Notifications

Access Restrictions are now indicated to students and instructors by a red Lock icon in the upper right of a restricted activity or resource.

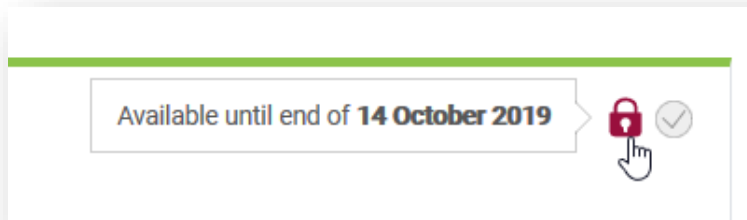

Old:

New:

Details about the restriction can be viewed by clicking the lock icon.

Resource Cards

Resources that display in the card format, such as Files, Folders, and URLs have been updated. Images can no longer be displayed in this area, and the cards have a taller profile.
