# Connecting Pearson MyLabs and Moodle

It is now possible to connect your Moodle and Pearson MyLabs sections together. This allows you to sync grades from MyLabs section to your Moodle gradebook, and also provides an easier registration process for your students.
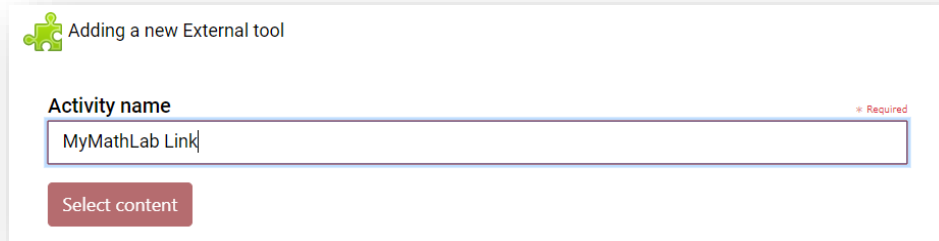

To begin the setup, first login to Moodle and navigate to the course you wish to pair with MyLabs. In your Moodle section, go to the topic where you wish to place the MyLabs tool, and select **Add an activity or resource** at the bottom of the topic.
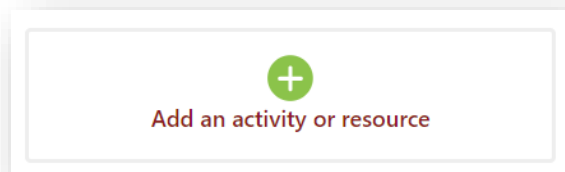

From the list of activities, select the **MyLabs and Mastering Tool**.
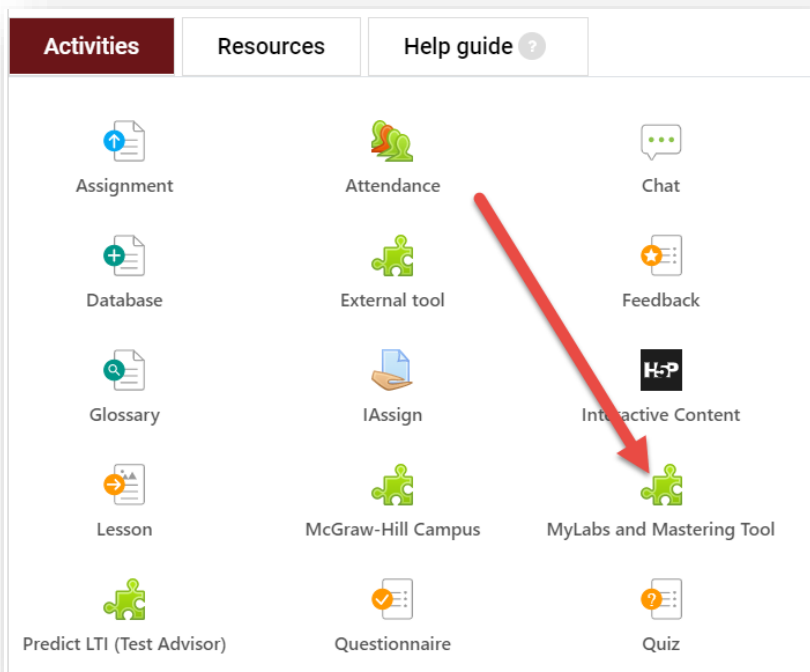

Enter a name for your MyLabs activity in the **Name** field, but do not save yet!

Adding a new External tool

Activity name * Required

MyMathLab Link

Select content

Expand the **Grade** heading on the right side of the page and find the **Type** option. Set this to **None,** even if you are using MyLabs assignments for points. The grades will be set later in the process.
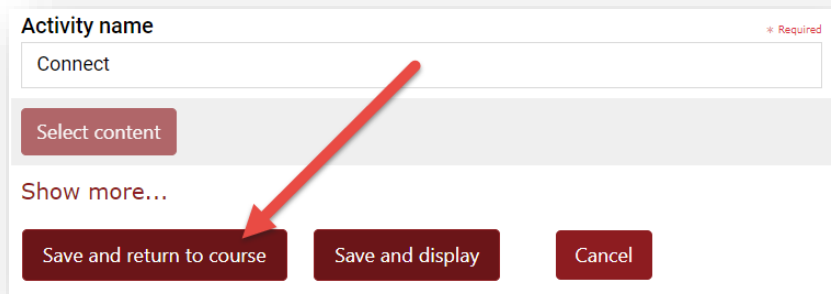

Grade

Grade

Type | None
None
Scale | Scale
Point
BTE

After setting the grade type to None, select **Save and return to course.**

Activity name * Required
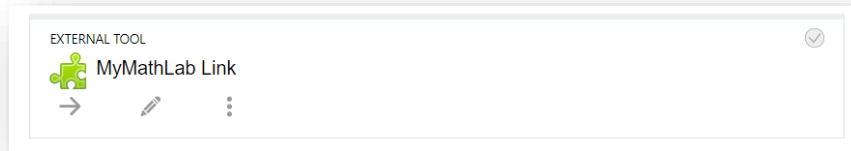

Connect

Select content

Show more...

Save and return to course | Save and display | Cancel

This will add a **MyLabs and Mastering Tool** activity into the topic where you began the process.

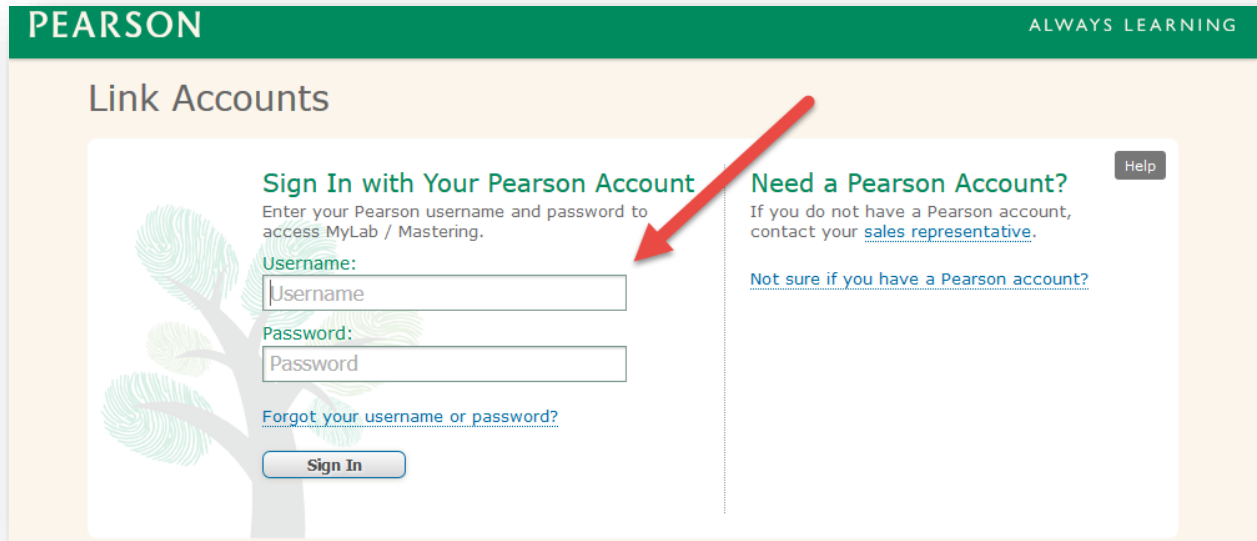

Open this activity now, and select the **Get Started** button.

Review the End-User License Agreement and Privacy Policy, and select **I accept** if you accept the terms.

If you already have a Pearson account, log in with that information. If you do not have any account, you may need to contact the Pearson sales representative.

Logging in will pair your Moodle and Pearson accounts. You will not need to repeat this step for any other courses you need to pair.
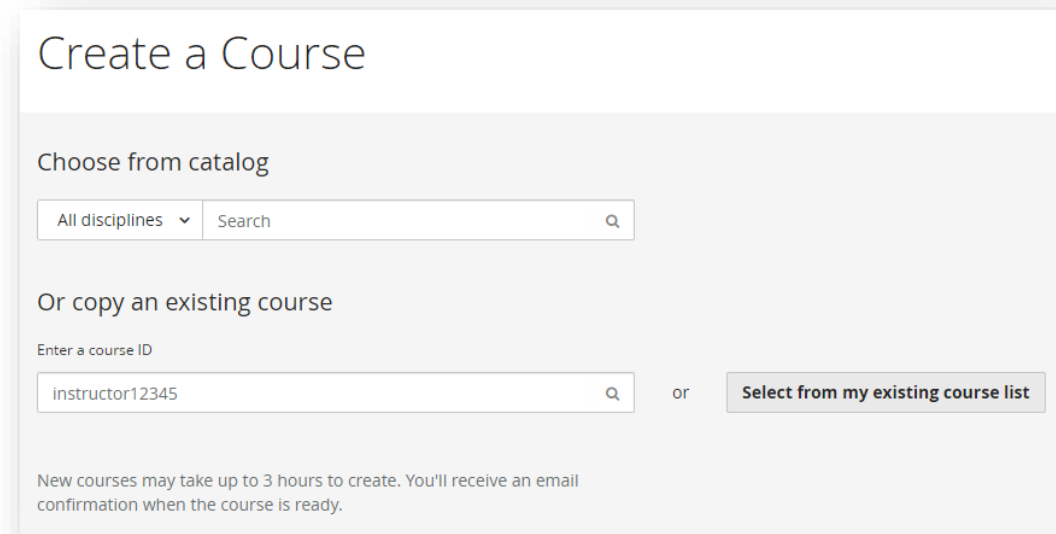

After logging in, select **Get Started**.

You will need to create a new course in Pearson MyLabs to pair with your Moodle section.

Select a method to create a course as you usually would. Once the course is created, the Pearson course and Moodle section will be paired automatically.

You can now use the activity in Moodle to access Pearson MyLabs without logging in, and your students can use this link in Moodle to register for the MyLabs course.
