Clinical Research Coordinator Program

Associate in Applied Science

Minimum of 65 credit hours

If you're interested in working with doctors, research nurses and clinical research coordinators to perform studies involving research participants, then the clinical research program at Oklahoma City Community College is for you. At OCCC, you can earn an associate degree in applied science or a certificate of mastery in clinical research. The work you do in clinical research varies from employer to employer but will likely include tasks such as recruiting participants, obtaining informed consent, collecting participant data, entering that data and managing clinical research projects. The clinical research projects themselves are also varied and can range from clinical trials for new chemotherapy drugs, lupus medications, rheumatoid arthritis treatments and diabetes treatments to testing medical devices such as ventricular heart valves and new materials for wound healing. You must apply for admission to the clinical research program after being accepted for admission to OCCC. All program applications are reviewed by a selection committee.

Course Sequence

</tbody>
</table>

Notes: This Technical and Occupational program is designed to prepare students to enter the job force following completion. See Technical and Occupational Programs in the general information section of the catalog.
Degree Program Course Descriptions

AHP 1013 - MEDICAL TERMINOLOGY  
Prerequisites: ENGL 0203, adequate placement score, or by meeting determined placement measures  
3 Credits After studying the root words, prefixes, and suffixes from which medical terms evolve, the student will correctly spell medical terms, define terms commonly used in medical fields, and determine the meaning of unfamiliar medical terms.

BIO 1314 - HUMAN ANATOMY AND PHYSIOLOGY I  
Prerequisites: ENGL 0203 or adequate placement score or by meeting determined placement measures; MATH 0403 or adequate math placement test score. An adequate biology placement test score or BIO 0123 or a college-level biological science class.  
4 Credits Through a systematic study of the structure and function of the human body, its cells, tissues, organs and systems, the student will identify and describe basic anatomical structures and fundamental physiological processes that occur in health and disease for the major body systems. Laboratory work which requires dissection is an integral and required part of the course.

BIO 1414 - HUMAN ANATOMY AND PHYSIOLOGY II  
Prerequisites: BIO 1314  
4 Credits With Human Anatomy & Physiology I as a foundation, the student will advance his or her study of the structure and function of the human body and will identify and describe more detailed anatomical structures and more comprehensive physiological processes that occur in health through a systematic survey of the major body systems. Laboratory work which requires dissection is an integral and required part of the course.

CHEM 1123 - SURVEY OF GENERAL, ORGANIC, AND BIOCHEMISTRY  
Prerequisites: ENGL 0203, adequate placement score, or by meeting determined placement measures; MATH 0403 or adequate math placement test score.  
3 Credits This course is designed for nursing and allied health programs which do not require General Chemistry I for science majors. This course is also appropriate for individuals interested in a general overview of chemistry. The course covers selected topics in general chemistry including unit conversions, atomic structure, chemical bonding, acids, bases, pH, chemical equilibrium, electrolytes, and properties of solutions. The course also introduces topics from organic and biochemistry. The relationship between chemical principles and human health is emphasized throughout the course.

COM 1123 - INTERPERSONAL COMMUNICATIONS  
Prerequisites: ENGL 0203, adequate placement score, or by meeting determined placement measures  
3 Credits The student will be able to identify why certain things happen as they do when two or more individuals come together to communicate for a specific purpose. The student must attest to his or her ability to understand the principles of interpersonal communication with emphasis on dyads, small groups, analysis of communication models and nonverbal communication, applying understanding to the major types of interpersonal communication problems in the work environment and in daily human relations.

CRC 1103 - INTRODUCTION TO CLINICAL RESEARCH  
Prerequisites: ENGL 0203, adequate placement score, or by meeting determined placement measures  
3 Credits The student will demonstrate knowledge of the history of human subject research, evolution of rules protecting human subjects, roles of the clinical research teams, clinical trial phases, and responsibilities of clinical research organizations.

CRC 1112 - VITAL SIGNS AND VENIPUNCTURE  
Prerequisites: BIO 1414  
2 Credits The student will 1) successfully measure blood pressure, pulse rate, and temperature, 2) draw intravenous blood, 3) perform human tissue and fluid storage procedures, and 4) utilize universal precautions for handling biological materials.

CRC 1203 - MEDICAL ETHICS AND CLIENT CARE  
Prerequisites: CRC 1103  
3 Credits The student will be able to describe the fundamentals of ethical principles involving human research subjects, understand informed consent and the role of the Internal Review Board, and identify vulnerable populations.

CRC 1303 - CLINICAL TRIALS AND RESEARCH REGULATIONS  
Prerequisites: CRC 1103  
3 Credits The student will receive and overview of federal and international guidelines governing clinical research and drug trials, including Good Clinical Practices and International Council on Harmonization guidelines. An emphasis will be placed on understanding of research organization compliance, responsibilities of the Internal Review Board and the Health Insurance Portability and Accountability Act (HIPAA). The student will identify and complete required regulatory forms, define human subject protection guidelines, compare federal versus international guidelines for clinical research and discuss conflict of interest issues.

CRC 1503 - CLINICAL TRIALS AND RESEARCH INTERNSHIP I  
Prerequisites: CRC 1203; CRC 1303  
3 Credits Students will shadow clinical research teams for four weeks at a private or university clinical research facility. Topics learned in the classroom will be demonstrated in an actual clinical research setting, giving the student exposure to a real-world setting while learning practical applications.

CRC 2003 - CLINICAL DATABASE APPLICATIONS  
Prerequisites: CRC 1103  
3 Credits The student will demonstrate mastery of the concepts of clinical research data management systems, quality assurance, data confidentiality and security, accurate preparation of case reports.

CRC 2103 - CLINICAL RESEARCH DESIGN  
Prerequisites: CRC 1203; CRC 1303  
3 Credits Students will acquire a basic knowledge of research design methodologies, data organization and presentation, participant eligibility, adverse event documentation, site visit and audit preparation, and budget design.

CRC 2113 - CLINICAL RESEARCH SITE MANAGEMENT  
Prerequisites: CRC 2103  
3 Credits The student will acquire a basic knowledge of research site organization, operation and management. The student will learn the process involved in grant applications, study initiation, documentation requirements, and site evaluations. Emphasis will be placed on defining process flow and interactions with Institutional Review Boards, sponsors, regulators, investigators, and the community.

CRC 2203 - PATHOPHYSIOLOGY  
Prerequisites: CHEM 1123; BIO 1414; AHP 1013  
3 Credits The student will utilize critical thinking models to understand the dynamic aspects of human health and disease processes. The student will develop a foundational knowledge of the pathogenesis and clinical manifestation of disease in order
to work effectively with subject data and communicate with other clinical research professionals.

**CRC 2213 - PHARMACOLOGY FOR CLINICAL RESEARCH**  
*Prerequisites: CHEM 1123; BIO 1414*  
*3 Credits* The student will correctly spell names of major drugs, place major drugs into correct therapeutic categories and identify indications, side effects, and trade and generic names. The student will identify and discuss the purpose of nutritional products, blood modifiers, hormones, diuretics, diabetes medications, cardiovascular agents, respiratory drugs, and gastrointestinal agents.

**CRC 2313 - CLINICAL PROTOCOL DESIGN**  
*Prerequisites: CRC 2103; CRC 2113*  
*3 Credits* Through study, discussion, and classroom activities the student will identify different research designs, master the rules for writing protocols, understand ethical issues involved in research protocol design, and develop the skills to design data collection forms.

**ENGL 1113 - ENGLISH COMPOSITION I**  
*Prerequisites: ENGL 0203, adequate placement score, or by meeting determined placement measures*  
*3 Credits* The student will write well-developed compositions which demonstrate the principles of unity, coherence, and organization and which contain specific details and vivid language. The students will locate library material and incorporate researched materials into compositions.

**ENGL 1233 - REPORT WRITING**  
*Prerequisites: ENGL 1113*  
*3 Credits* The student will improve composition skills by developing and constructing various types of reports based on a particular situation in his or her career field.

**HIST 1483 - U.S. HISTORY TO THE CIVIL WAR**  
*Prerequisites: ENGL 0203, adequate placement score, or by meeting determined placement measures*  
*3 Credits* After analyzing events in American history from 1400 to 1870 in such areas as political reform, industrialization, urbanization, ethnic acculturation and war, the student will be able to identify meaningful changes in his society, identify equal rights in that society, and help resolve conflict in this society based on the students search for change, equal rights and conflicts in the American past.

**MATH 2013 - INTRODUCTION TO STATISTICS**  
*Prerequisites: MATH 0403 or adequate math placement test score; ENGL 0203, adequate placement score, or by meeting determined placement measures*  
*3 Credits* The student will solve problems applying the concepts of random sampling, elementary probability, testing hypotheses, descriptive measures, chi-square, regression and correlation, and analysis of variance.

**POLSC 1113 - AMERICAN FEDERAL GOVERNMENT**  
*Prerequisites: ENGL 0203, adequate placement score, or by meeting determined placement measures*  
*3 Credits* A study of the principles, structure, processes and functions of the United States federal government.

**SCL 1001 - SUCCESS IN COLLEGE AND LIFE**  
*Prerequisites: ENGL 0106 or adequate reading/writing assessment scores*  
*1 Credit* Students will learn best practices for academic, career, and personal success. Students will discover their individual strengths, interests, and values to create a personalized plan; select and utilize resources that are applicable to their growth and success; and engage as active and responsible members of the academic community. This course should be taken during a student’s first semester of college work at Oklahoma City Community College and is a required course in degree plans to satisfy the Life Skills requirement.
