

Division of Chemistry and Biological Sciences

Sonya Williams, Ph.D., Dean

Jennifer Gilbertson, Division Assistant

The Chemistry and Biological Sciences Division seeks to encourage an attitude of discovery and critical analysis along with a genuine interest in the sciences. We strive to offer a wide variety of introductory and second-year college science courses that not only challenge students' traditional views of science, but build scientific skills that create a sound foundation which students will use when viewing the world around them. Our goal is to offer diversified science courses that are relevant and provide students the knowledge and experience to pursue further studies in the sciences or simply participate in a modern society dominated by science and technology. Our emphasis is on an understanding of modern scientific methodologies, including current methods of scientific experimentation, as well as up-to-date laboratory techniques and equipment.
