

Academic Affairs Math Group

Progress Since Last Meeting

- January 29th OKCPS, OCCC and UCO met as a cross-functional team to review curricula to better align courses and reduce remediation
- March 25th South Santa Fe School District, OCCC, and UCO formed a math remediation group to help high school students be ready for college math upon graduation.

South Santa Fe School District Project

GOALS

- Test students early to ensure that those students who have taken High School Algebra II are ready for college math
- Speed up remediation process for students who require remediation by having the student complete some/all remediation in high school
- Develop a fourth year math class

South Santa Fe School District Project

Next Steps

- Informing the students to allow them to have access to the right college connections
- Curriculum mapping between SSF, OCCC, and UCO
- Adaptive pilot program for remediating students while they are still in high school.
- Define a students pathway for senior year math
- Success in college is the Goal

OCCC and UCO's Goals

- Support South Santa Fe School District in the development of a program that will lower remediation in college
- Work toward a joint placement exam for SSF high school students who have been remediated while in high school
