

Moodle Improvements - Spring 2021

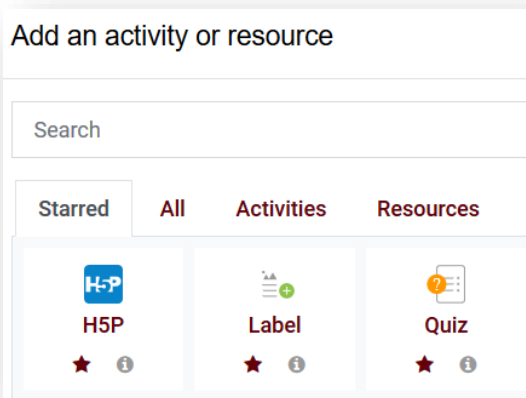

User Interface Improvements

Activity Chooser

Several improvements have been made to the Activity Chooser which make it easier to locate the activities and resources you wish to add. Specifically, the "All" tab has been added, which displays all activities and resources to a single tab.

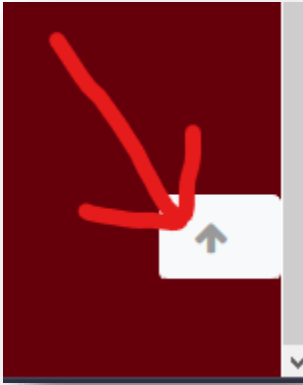

Additionally, the ability to "Star" activities was added. Activities can be starred by selecting the Star icon below the activity. Starred activities are displayed on the "Starred" tab.

Go to Top

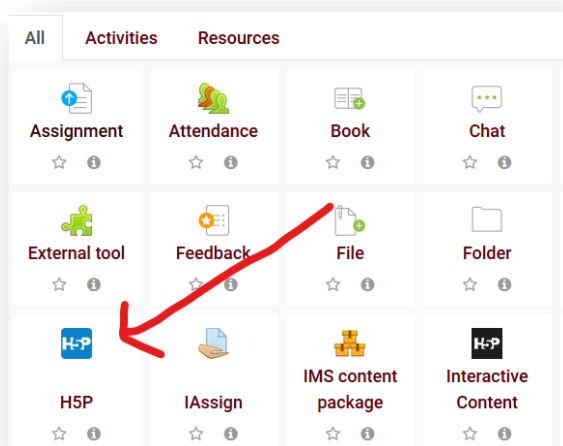

A "Go to Top" button feature has been added. This button appears on the bottom right when scrolling down a page. Selecting it will return the view to the top of the page.

H5P Integration – Work In Progress

H5P is being integrated into Moodle. The integration is still a work in progress, and the setup is very different than the existing H5P implementation. The new integration improves the tracking of student attempts in H5P activities and adds an H5P Content Bank which allows instructors to easily select content.

The old H5P option with the black icon and "Interactive Content" text will function as usual and does not offer the new options. The new H5P activity with attempt tracking is indicated by a blue H5P icon in the Activity Chooser:

The setup of the new H5P activity type varies greatly from the existing activity. If you wish to explore this H5P content type, it is recommended you contact the Center for Learning and Teaching for information before beginning the setup process.

If you have questions or need assistance, please contact the Center for Learning and Teaching at clt@occc.edu or 405-682-7838.
