

Networking Technologies

CS 2303

DEGREE PROGRAM COURSE DESCRIPTIONS

Students will learn how to install, configure, and troubleshoot basic networking hardware, protocols, and services and to describe the features and functions of networking components. A foundational knowledge in the important areas of media and topologies, protocols and standards, network implementation, and network support will be developed using a combination of lectures and interactive assignments.

PREREQUISITES?

MATH 0203 or adequate math placement; CS 1353

CREDIT HOURS

3
