

Library's Information Literacy Efforts

The Library demonstrates the importance of information literacy by including it in its mission statement.... *"Provide exemplary services that foster information literacy and enhance teaching and learning...."*

The importance of information literacy is demonstrated in the number of class instruction sessions that are conducted throughout the year. The Library also made it a top concern when the College developed the Success in College and Life class. The Library requested representation on the Success task force and worked very hard to develop an in-depth library module and incorporate it into the course. The librarians also work with a number of the general education faculty throughout the year and have collaborated to develop library modules for the gen ed courses. The Library supports and uses the American Library Association's guidelines and standards for information literacy as a basic foundation.
