<b>Total Cost for <i>Traditional</i> Track Program</b>	<b>\$12527.67</b>	
<b>Total Cost for <i>Flex</i> Track Program</b>		<b>\$12692.17</b>

## EXPLANATION OF COSTS:

### **Oklahoma Resident Tuition and Fees:**

The approximate tuition is for students who need to take all courses required for graduation with the Associate in Applied Science Degree. If a student has previously taken general education coursework, that transfer, this amount is incorrect. Current cost for residents is \$135.29/credit hour.

Non-Resident Tuition and Fees: \$326.99/credit hour.

**Application Fee:** \$20 selective admission application fee for OTA applicants

**Book costs** are approximate and will vary depending on location of purchase. Books will be an excellent resource throughout the career of the licensed COTA.

**OTA student liability insurance:** The est. student liability insurance fees must be paid annually each fall at the Bursar's office. The insurance will cover the student in lab and while on clinical rotation. The student will not allowed to participate without the insurance.

**OTA Supplies:** These supplies are provided in a kit and include lab supplies such as goniometers, gait belts, and Hip Kits. These supplies are presented to students at the beginning of the lab courses.

**AOTA and OKOTA Dues:** Joining the AOTA and OKOTA is voluntary but strongly encouraged. The students will gain valuable resources such as publications, full-text articles online, employment searches, networking opportunities and professional resources.

**Travel:** Travel to and from campus and Fieldwork sites costs are not included in the cost estimates. These travel costs will vary based on the student proximity to campus and Fieldwork sites.
