

## How do I revise a rough draft with Turnitin?

Your instructor may ask you to submit a rough draft to Turnitin for review. Once you have evaluated the comments provided and analyzed the similarity between your work and outside sources, you should revise your paper for the final draft.

To access the assignment, first select the assignment link in the appropriate topic on the course home page.

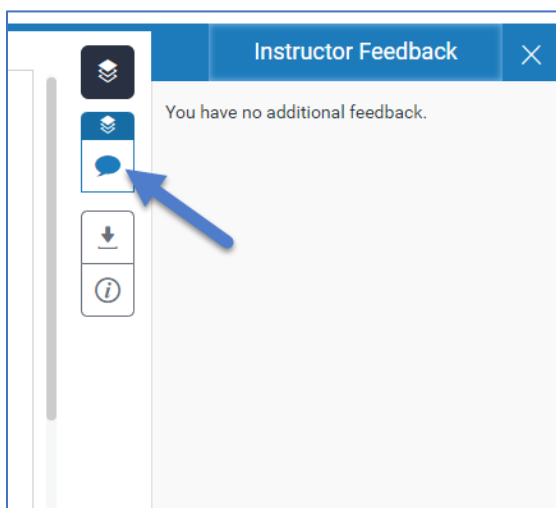

To open your paper, select the title of your submission. This will open feedback studio where you will view your paper.

## Instructor Feedback

If your instructor has left overall comments on your paper, you will find them in the **Instructor Feedback** menu. Select the instructor feedback icon to open the menu.

You may also see **blue comments** on your paper. These comments are from your instructor and can be opened by clicking on them.

Send me a message on Moodle for questions about comments made on your paper

My reason for applying to the University of Cincinnati Master of Science in Information Technology program is to grow my knowledge in the field and reach greater heights in my professional and educational journey. As a former educator, I have always profoundly loved learning. I always believed the happiest job would be a position where I could go to school forever; therefore, I decided to become a teacher. While that made logical sense then, it didn't fit my financial or intellectual needs. *Why not?*

Once I decided to leave the classroom, I knew I wanted to find something that would allow me to grow continually, learn something new every day, and open doors to work for companies that make a difference in people's lives. After a few months of research, I found this was a possibility

Maybe add examples of different companies you'd like to work for and compare them with previous UC graduates

"Greater heights" could be replaced with more unique vocabulary

wanted to find something that would allow me to grow continually, learn something new every day, and open doors to work for companies that make a difference in people's lives. After a few months of research, I found this was a possibility

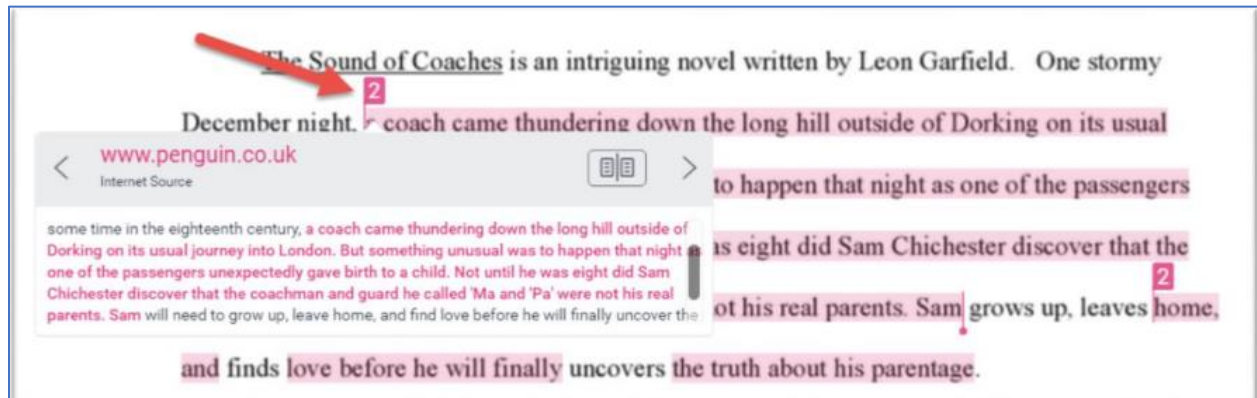

## Similarity Report

The Similarity Report will show you any similarities between your paper and outside sources (these may include internet sources, journals, periodicals, publications, or another student's work).

To open the similarity report, select the overall similarity percentage to open the **Match Overview**, which lists sources and the similarity percentage between them and your work.

Any similarity between your work and a source will be highlighted. You can click on the source number to see the source information.

As you look over the originality report, you should make sure you have provided appropriate citations for each of your sources. You may also want to revise your paper to make it more original. The more original your paper is, the lower the overall similarity percentage will be.

You can download or print the similarity report by selecting the download icon on the right.
